Tomatillo, Husk Tomato

Tomatillo ‘Goldie’ 75 days

Small orange berry with a papery husk, fruits drop from the plant when ripe. Very prolific! Very sweet flavor for eating raw, or dried like raisins. Organic source.

Tomatillo ‘Tamayo’ 65 days

Good vigor, high yields with 2 ½ - 3” oz. fruit, Mexican husk green tomato, roast for salsa verde. Fruits hold longer than other varieties.

Tomato

Indeterminate Tomatoes

Indeterminate tomatoes grow all season and have no set limit to their height or sprawl. This means they produce fruit all season, but do require support, ample sun, regular watering and rich soil. An indeterminate tomato is NOT a good choice for container or patio gardening.

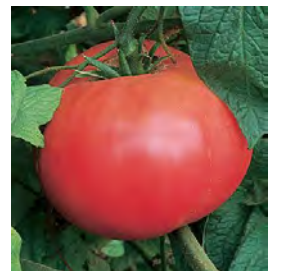

‘Blush’ 70 days

Sweet and fruity flavor makes a great snacking tomato. These are elongated yellow cherry tomatoes with a red “blush” at the blossom end. Does well in tougher conditions. Indeterminate. Organic Source

‘Brandywine Red’ 75-85 days

Heirloom, very tasty with low acidity, higher yield with cool temperatures. Beefsteak type fruit, perfect for slicing. 16-30 oz. fruit, indeterminate.

'Buffalosun'	85 days	Large yellow fruit with red/orange flames and a marbled interior. All American Selection. High yields with 18-24 oz. flat, ribbed fruit. Few seeds and meaty texture. Disease resistant and indeterminate.	
'Cherokee Purple'	72-90 days	Heirloom. Flavorful purple-brown fruit with a dusty pink interior. 10-12 oz. fruit, slightly flattened on short vines. Indeterminate. Organic source.	
'Chocolate Sprinkles'	50-55 days	Cherry type, red/green striped, bite sized, 1.5" fruit. Sweet-tart flavor and resists cracking. Good disease resistance. Indeterminate.	
'Damsel'	73 days	Beefsteak type, with pink skin. Sweet, tangy flavor. Late blight resistant. Globe shaped, 8-12 oz. fruit on compact plants. Indeterminate. Organic source.	
'Genuwine'	70-75 days	Heirloom marriage cross between Brandywine and Costoluto Genovese. Matures 12-19 days earlier than Brandywine. Beefsteak type, with 10-11 oz. ribbed fruit, excellent for slicing. Indeterminate.	
'German Johnson'	75 days	Pink heirloom tomato. More vigorous and higher yielding than other Brandywine types. 8-16 oz fruits have deep, acidic flavor and rich, creamy texture. Indeterminate. Organic Source.	

'Juliet'	60 days	Grape to Roma type, with deep red, shiny fruits in heavy clusters. High yielding with high disease and crack resistance. 1.5-2 oz. fruit is good in salads, salsa and sauce. All American Selection. One of our favorites! Indeterminate.	
'Mortgage Lifter'	80 days	Heirloom. Beefsteak type with red-pink, slightly ribbed fruit. Consistent winner in taste tests. Fruit is 18-28 oz. or larger with few seeds. Indeterminate.	
'New Girl'	62 days	First tomatoes of the season! Dependable, early producer with high disease resistance and great flavor. Better than Early Girl, with 4-6 oz. fruit. Indeterminate. Organic source.	
'Oxheart Red'	75-85 days	Heirloom. Red, heart shaped fruit is thick walled and excellent for slicing. Meaty with few seeds. Excellent flavor, with fruit reaching 24-30 oz. Plant can grow to 6' high. Indeterminate.	
'Pineapple'	85-95 days	Heirloom. Large beefsteak type with bright yellow and red striped fruit. Meaty texture and a sweet, mild flavor with a high yield of 18-24 oz. fruit. Indeterminate.	
'San Marzano'	70 days	Heirloom. Classic red plum type, excellent for sauce. Compact 40" plants produce 4-6 oz. fruit that are easy to peel. Indeterminate. Organic source.	

‘Speckled Roman’

85 days

Elongated plum type, with bright red skin and yellow streaks. Meaty fruit has very little juice, but excellent flavor for sauce at 6-8 oz. each. Indeterminate. Organic source.

‘Sun Gold’

65 days

Cherry type, small orange fruit. Perfect for snacking right off the vine. 1 oz. fruit with a tangy, sweet flavor and prolific growth. Skin is thinner than ‘Sunsugar’. Indeterminate

‘Sun Sugar’

62 days

Cherry type, gold-orange fruit. Very sweet with good crack resistance. 1 oz. fruit can be harvested almost daily. One of our favorites! Indeterminate.

‘Super Fantastic’

70 days

Beefsteak type, dark red, sweet fruit. Good disease resistance. Meaty, smooth-skinned, 10 oz. fruit produced all summer. Indeterminate.

‘Supersweet 100’

57-62 days

Cherry type, small red fruit grow in long hanging clusters. 1 oz. fruit is sweet and prolific. Kids love these. Indeterminate.

‘Tidy Treats’

60-65 days

Best cherry for patio gardens! Tasty and high-yielding with a sweet flavor. Easily supported with a standard tomato cage. Compact indeterminate. Short like determinate tomato with productivity of an indeterminate tomato.

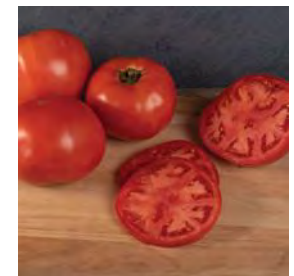

Determinate Tomatoes

Determinate tomatoes will grow to a certain height, and then stop. They do not continue growing or setting fruit all summer, though the ones we grow are prolific in their season. Determinate tomatoes are great for containers and patio gardening as they don't take as much space as indeterminate tomatoes. They may still require some support especially when fruiting, but not extensive trellising. Standard tomato cages work well for determinate tomatoes. Provide with a rich media, lots of sun and water and enjoy the harvest!

'Bush Champion II' 65 days One of the best for small gardens, containers, and patios. These compact plants only grow to 24-30" and produce extra-early 8-12 oz fruits. Great flavor and good disease resistance. Determinate.

'Galahad' 65-70 days Mid-sized red slicing tomato. Early-fruiting and fantastic flavor in round, 7-12 oz fruit. Great disease resistance. Determinate. Organic source.

'Mountain Merit' 75 days Red slicing tomato. Excellent late blight resistance on compact plants. Juicy, mildly flavored, 10-12 oz. fruit. All American Selection. Determinate.

'Summerlast' 55-65 days Cherry type, red fruit. Dwarf plant is excellent for small spaces or patio containers. High yields of 1-2 oz. round fruit. Late blight resistant. Determinate.

This list only encompasses the tomatoes and tomatillo that are being grown from seed at Acer Gardens for 2023. Other varieties will also be available throughout the season!
